

LITTLE BLACK BOOK of DESIGN

# SCOTT DRESNER

Throughout his 30-year career, Scott Dresner has elevated Chicago kitchens and baths to the highest design level. With a practical yet creative point of view, Scott seamlessly blends design and function while using quality and innovative building methods. Since Scott has always taken inspiration from European design it seems only fitting that he recently launched a private label cabinetry line, which he has fabricated in Italy.

His renowned expertise in style, balance and proportion makes it no surprise that he is responsible for over 7,500 beautifully designed kitchens and baths installed in Chicago homes and businesses. Along with his keen eye and knowledge of the industry, Scott also brings versatility with his skill and experience in both residential and commercial projects.

With unflagging passion, dedication and expertise, Scott maintains his position as an innovator in both the cabinetry and construction industries. Meanwhile, he continues to complete thousands of multi-unit developments across the country, designing and building kitchens, baths and wall-units ranging from traditional to contemporary and everything in-between.
